

REMEDIATION SERVICES

With so many remediation options available, choosing the best approach to meet your clean up objectives can be daunting.

Cascade Environmental has the in-house capabilities and expertise to support your project from concept to completion. We offer services ranging from traditional and high resolution site characterization to thermal source treatment and injection or emplacement oxidants, reductants and bio amendments. We work closely with you to identify cost-effective solutions utilizing individual or combined technologies based on site complexity.

THE CASCADE ADVANTAGE

- **Simple** - Our integrated services reduce the complexities of managing multiple subcontractors.
- **Effective** - Our collaborative approach delivers project synergies for optimization of data collection and remedy design, saving you time and money.
- **Experience** - Our team of seasoned experts have the know-how to deploy the right tools at the right time to achieve the right outcome.
- **Assets** - Our clients have access to the most extensive fleet of mobile systems for on-site high resolution site characterization, injection, fracturing, and drilling in the United States.

REMEDIATION SERVICES

- Chemical Injections
 - ISCO, ISCR, ISB
 - Bioremediation
 - Cascade Chemistries
- Standard and Enhanced Emplacement Technologies
 - DPT / Well Injections
 - Hydraulic & Pneumatic Fracturing
- Thermal Remediation
 - Thermal Conductive Heating
 - Electrical Resistance Heating
 - Steam Enhanced Extraction
- Excavation
- Soil Mixing
- In Situ Stabilization
- Permeable Reactive Barriers

COMBINED TECHNOLOGIES AVAILABLE
